≡ EXCELLENT ≡ QUALITY

Moldova is famous for its fertile and eco-friendly soils, on which from ancient times is cultivated high quality wheat. The water from the deepest layers of the earth, which were once the bottom of an ancient sea; is another natural heritage of our republic. Combined with the centuries-old experience of manufacturing spirits, these unique Components have become the basis of the new special products – EuroAlco whiskey, which won't leave you indifferent and will bring a new stream of fresh emotions in your life.

PRODUCTION PROCESS

THE PROCESS OF MAKING WHISKY MAY
APPEAR TO BE SIMPLE, BUT ITS RESULT
CAN PRODUCE AN INFINITELY COMPLEX
AND EXQUISITE DRINK.

≡ PRODUCTION PROCESS ≡

WE CONTROL EVERY STEP OF THE SPIRIT - MAKING: FROM MILLING THE LOCALLY GROWN GRAIN TO DISTILLING, INFUSING IN BARRELS, AND FINALLY, BOTTLING.

≡ ORGANIC SPIRIT ≡

We believe that the best spirits must come from the best ingredients. The grain, that is used in production, is obtained from organic Moldavian farms. Involving our local producers in the process of creating the product, we support this way the local economy and the sustainable agriculture. All the enzymes and yeast that are used in production are also organic and non-gmo (non-genetically modified organism).

≡ WATER ≡
IS THE SOUL OF
WHISKEY

All of our products are distilled in our own facility.
Our water - an essential ingredient in
Distillation - clear, sweet, with a minimum
Amount of impurities and natural minerals - it
comes from the deep ancient layers of the earth and
it is additionally treated, for purification, with
natural charcoal.
According to the opinion of some experts, the
water for whisky also means the same as the
Grapes for wine.

≡ BARELLS ≡

All of our whiskeys are aged for three years in 30-gallon oak barrels (113,55 liters). This insures the distillate, to develop and enrich its flavor thanks to the clear notes of the deep fragrance. Aging in specially re-toasted barrels from cognac and port wine, gives the whiskey a special color, unique bouquet and oiliness.

————— ◆ ◆ ◆ ◆ ◆ —————

We use the barrels, made by the best local coopers. We age our whiskey, till it extracts the full range of aromas from the oak.

FINALLY, WE BOTTLE

Every product we make
is certified
